Greater Monadnock Public Health Network Announces Free Public H1N1 Vaccine Clinic

(Keene, NH, 12/14/2009) — The Greater Monadnock Public Health Network (GMPHN) has announced a free public H1N1 vaccine clinic on Tuesday, December 15, 2009, from 6 PM to 9 PM at Keene State College. The clinic will be held in the Young Student Center, in the Mabel Brown Room (second floor). To view a campus map, please click on the following link:

<http://www.keene.edu/aboutksc/campusmap.cfm>

This H1N1 vaccine clinic will be open to Keene State College students and staff as well as New Hampshire residents who are in Phases I, II, and III of the NH DHHS H1N1 vaccine distribution plan. These phases include:

- All children and young adults ages 4 years* – 24 years of age
- Adults 25 – 64 years of age with underlying medical conditions
- Pregnant women and their partners
- People caring for or living with infants younger than 6 months
- Healthcare workers and EMS/first responders

H1N1 UPDATE

Keene, NH 03431
603-354-6836
<http://co.cheshire.nh.us/PublicHealth/>

** Please note that children 6 months – 3 years of age are eligible to receive the H1N1 vaccine. Parents/guardians of children 6 months – 3 years should contact their pediatricians or Judy Harris at HCS at 603-352-2253.*

There is no charge to receive the H1N1 vaccine at this clinic. Nurses will offer participants nasal mist or injectable vaccine depending on age and health status. The clinic will be open until 9 PM or until the vaccine supply runs out. No pre-registration is required; vaccines will be administered on a first-come, first-served basis.

All H1N1 vaccines are offered in accordance with New Hampshire's vaccination distribution plan to reach those at highest risks for complications due to limited supplies. (See: www.nh.gov/H1N1)

Both the H1N1 and seasonal vaccines have been shown to be safe. The only people who should not get a flu vaccine are those who are allergic to eggs, anyone who has had a serious reaction to a flu shot in the past, anyone with a history of Guillain-Barre syndrome, and children younger than 6 months old.

Even if you have already had flu-like symptoms you should still be immunized. There are many different strains of influenza. You may or may not have had the strain the vaccine is intended to protect against. It's also possible to get sick again.

If you think you have the flu, the best place for you to be is at home. Take the time to let the illness run its course. Don't rush your recovery. The best way to ensure your health, as well as your family's and friends' wellness, is to take care of yourself.

<http://co.cheshire.nh.us/PublicHealth/>

- Stay home from work or school until your fever has been gone for least 24 hours without the use of fever reducing medications.
- Stay away from others.
- Get plenty of rest.
- Drink clear fluids.
- Wear a face mask if you have to go in the public.
- Drink from your own container.

If you are pregnant or have a health condition such as diabetes, heart disease, asthma, or emphysema, check with your health care provider and ask if you need any special care.

Anyone who gets the flu should watch for signs that the illness is getting worse. Call your doctor if you experience or observe any of these warning signs.

- Adults:

- Shortness of breath or respiratory distress
- Fever greater than 100 degrees for more than 3 days
- Chest or abdominal pain
- Lightheadedness
- Disorientation or confusion

- Children:

- Difficulty breathing
- Blue skin color

<http://co.cheshire.nh.us/PublicHealth/>

- Unable to keep liquids down
- Extreme drowsiness, listlessness, or sluggishness

These warning signs could mean a person is developing complications to the flu, which should be taken seriously.

For more information, treatment resources, or other assistance, call 2-1-1 (in NH) or 1-866-444-4211 (all other states) any time of day or visit www.211nh.org. You can also visit websites for Cheshire Medical Center/Dartmouth-Hitchcock Keene (CMD/DHK) (www.cheshiremed.org) or the Greater Monadnock Public Health Network (GMPHN) (<http://co.cheshire.nh.us/PublicHealth/>). CMC/DHK and GMPHN work together to plan and protect public health and safety in concert with the New Hampshire Department of Health and Human Services (www.nh.gov/h1n1). The GMPHN is housed by Cheshire Medical Center/Dartmouth-Hitchcock Keene and in collaboration with Cheshire County is financed under an agreement with the State of New Hampshire, Department of Health and Human Services, and Division of Public Health Services with funds provided by the Centers for Disease Control and Prevention.

Together CMC/DHK and GMPHN will offer updates on flu season preventions and precautions for the Monadnock Region.

For flu clinic information any time of day or night, call Cheshire Medical/Center Dartmouth-Hitchcock Keene's information lines.
